Security
Doors

The extensive portfolio of steel doors provides you with both versatile, general-purpose doors and certified high-security doors.

All doors are made to measure to suit your requirements, and are available at competitive prices. Our selection of third-party accredited doors offers an assured level of protection for your buildings.

M2M$^{+Express}$

Ideal as an emergency replacement door. M2M^{GO} doors can be configured as a single or double personnel door or fire exit, with a selection of optional extras.

M2M⁺

M2M+ multi-purpose steel doorsets are suitable for internal or external installation in industrial, commercial, and even domestic buildings. Available with an extensive selection of optional extras, vision panels, and louvres, M2M+ doorsets can be tailored to your exact requirements. M2M+ doors are commonly installed in commercial and industrial premises.

M2M⁺²⁴

M2M⁺²⁴ offers an enhanced security performance ensuring the doorset can withstand a series of manual and mechanical tests over a defined period. M2M⁺²⁴ can be configured as a single or double door, with mechanical and electric locking. These doorsets offer great protection to commercial and residential buildings, plant rooms, or substations and are designed to meet the industry standard PAS24.
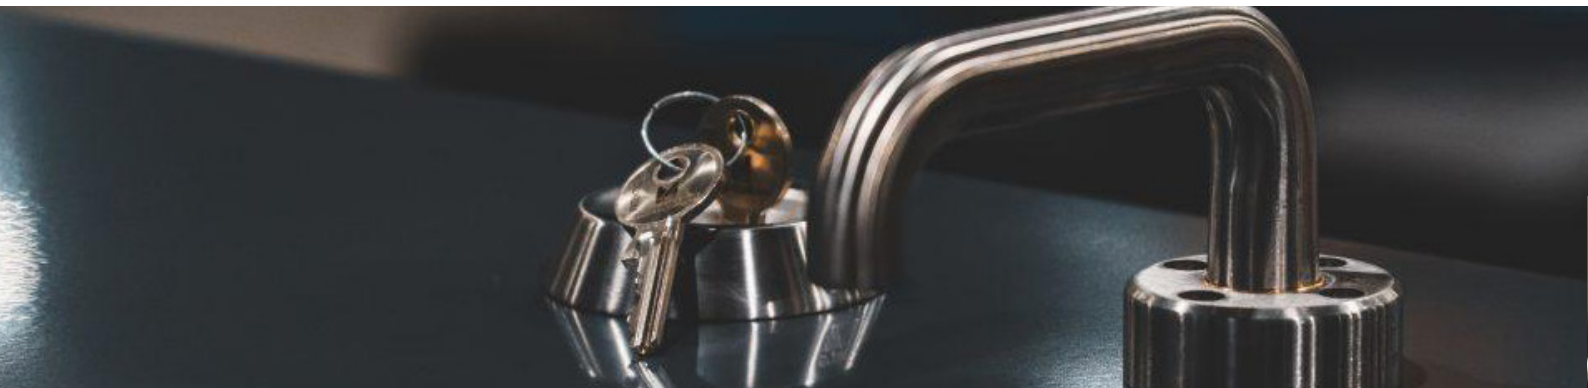

Substation Doors

M2M²

Certified by the LPCB to LPS 1175: Issue 7 Security Rating 2, M2M² doorsets provide defence against opportunist attacks. M2M² doors are particularly popular among utility clients, and companies operating within remote or substation sites.

M2M³

Providing a high level of resistance to attack, M2M³ doors have achieved LPCB accreditation to LPS 1175: Issue 7 Security Rating 3. Offering the most extensive series of SR3 certified options, M2M³ doorsets are available with a wide range of hardware, louvres, vision panels, and MICO Abryll locking options.

M2M⁴

M2M⁴ doors are certified by the LPCB to LPS 1175: Issue 7 Security Rating 4, assuring specifiers of the high resistance to attack that this doorset offers. M2M⁴ high security doorsets are ideal for installation in high value infrastructure, government and defence premises, and financial buildings.

"Excellent and fast response from the team"

Features &
Enhancements
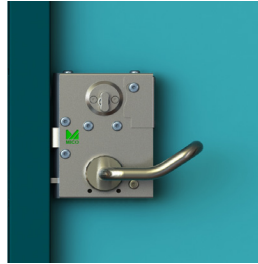

ACCREDITATIONS

Fire - All M2M doors are available with a fire rating of up to FD240, offering fire integrity resistance for four hours, awarded by Exova under the CERTIFIRE scheme.

Acoustic - M2M doors are available with an acoustic rating of up to Rw42, offering a noise reduction of up to 42dB, depending on specification.

Flood - All M2M doors can be engineered as flood defence doors, which have been successfully tested to PAS 1188, with a designated maximum water depth of 840mm.

LOCKING OPTIONS

M2M⁺ doors are available with an extensive series of locks to suit a wide variety of applications.

M2M² doors are available with a selection of MICO Elite locks.

M2M³ and **M2M⁴** doors are fitted with high-security locks from the MICO Abryll and MICO 942 ranges.

All **M2M** doors are available with a range of access control options. These can provide ease of access with a push button, or control access with a keypad, for example.

A variety of ironmongery options outside of our standard scope are also available to provide desired functionality.

GLAZING & LOUVRES

Vision panels are available in a range of sizes and with various types of glazing.

A selection of punched and bladed louvres are available to provide ventilation to suit various airflow requirements.

ANCILLARY ITEMS

A wide range of door closers and limit stays can be fitted to all M2M doors.

Cable ports can be integrated into doorsets to allow for cables to run through the leaf.

Padlockable lock covers are available to provide additional protection against attack.

Other options include additional hardware and door furniture, spy viewers, letterboxes and drop bars,.

PANELS

Side and top panels are available, including louvred, glazed or solid options to secure larger structural openings.

Hinged or removable top panels are also available to provide a larger clearance, where required.

Standalone louvre panels are available to provide ventilation.

COLOURS & FINISHES

All M2M doors are available primed or polyester powder coated in a selection of 56 colours, as standard, in a range of finishes.
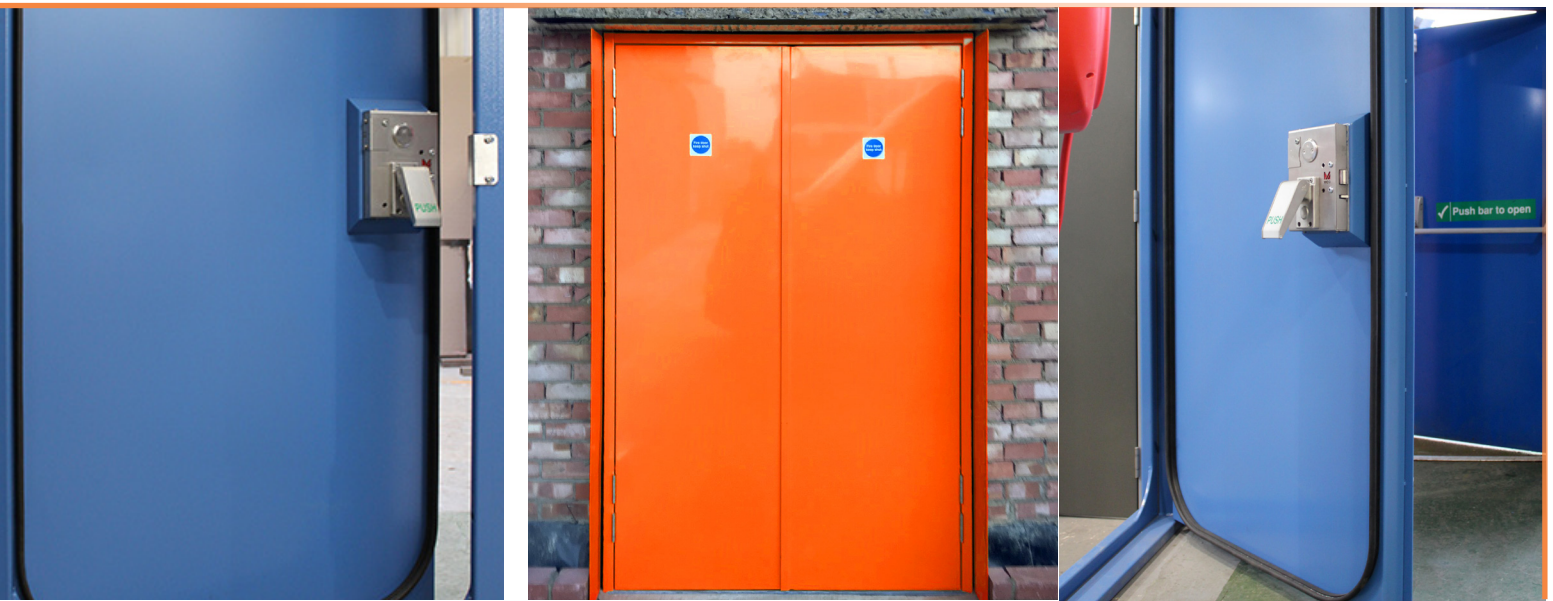

Woodgrain effects and other non-standard colours and finishes are also available at a premium.

Certified
Doors

The selection of certified security doors offers an assured level of protection for your buildings.

M2M^{FD}

The M2M^{FD} range offers a series of fire doors available iwth a rating of FD30 TO FD240, providing up to four hours of fire integrity, as certified by a globally-recognised fire testing and certification company.

PUSH TO OPEN

PUSH TO OPEN

M2M^{FL}

The M2M^{FL} range of flood defence doorsets have been successfully tested to PAS 1188-1:2014, with a designated maximum water depth of 840mm.

M2M^{AC}

The M2M^{AC} range of acoustic doorsets comprises of M2M^{+AC} and M2M2^{AC}, available with an ISO 10140 rating from Rw28 to Rw42, depending on specification.M2M^{+AC} doorsets are available with a wide range of acoustic ratings, and are ideal for project briefs that do not require third party security accreditation.

Architectural
Doors

Widely installed throughout London, artchitectural door are located in skyscrapers, luxury accommodation, transport hubs and high-value retail complexes.

CAPITAL[45]

An innovative product for inspiring buildings, the Capital[45] This premium architectural steel doorset is bespoke-engineered and precision-manufactured to suit infrastructure requirements. Capital[45] doorsets are available with third-party acoustic, thermal and fire accreditations to suit a wide range of project briefs.

Communal
Doors

Supplying the UK market for over 25 years, a leading provider of communal entrance solutions, including doors and panels, for the social housing and public building sectors

CLASSIC^{AL}

Classic^{AL} communal entrance doors and panels are constructed from reinforced aluminium and stainless steel, combining superior strength with a contemporary appearance. Designed to meet rigorous requirements, Classic^{AL} doors are LPCB certified to LPS 2081 Security Rating B, and are supplied with a one year anti-rust warranty.

Kiosks &
Bottle Frames

Our portfolio includes high-security kiosks, steel doors, bar sets, access hatches, cylinder clamps, bottle frames and anti-climb solutions, as well as associated civil works.

CYLINDER CLAMPS

Developed in conjunction with the Security and Emergency Measures Direction, cylinder clamps are used to secure gas bottles in sensitive areas. They are designed to protect against theft and misuse of hazardous chemicals. Offering a certified level of protection against theft or damage, our cylinder clamps are accredited to LPS 1175 SR2 by the LPCB.

KIOSKS

Designed to protect vulnerable buildings and high value assets, we offer a range of modular enclosures. Kiosks can be manufactured to any size, and can be used for direct replacements or over units. Standard units are supplied with padlockable single or double leaf doors. Padlocks are protected with a user-friendly shroud. Optional upgrades include key access doors, celotex insulation, and varnished ply lining.
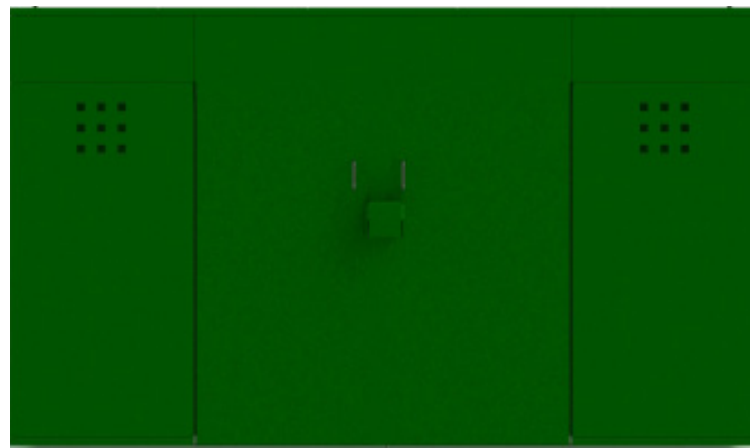

"Great and Prompt Service"

Bar Sets &
Crowd Control Gates

With a comprehensive product portfolio also extends to a range of modular high-security bar sets, as well as a selection of collapsible crowd control gates.

VERTEX

Vertex is a range of crowd control, emergency escape gates, comprising of the Vertex2 and Vertex3, certified by the LPCB to LPS 1175 SR2 and SR3, respectively. Designed in response to an increased demand for a high-security, anti-surge solution for high-traffic areas, Vertex gates have exceeded load tests specified in BS EN 1991-1-1-2002, and have been subjected to 5kN/m perpendicular loading, simulating crowd surge.

BARSETS

Spartan is a range of high-security bar sets, certified by the LPCB to LPS 1175 SR2 and SR4, respectively. The lightweight construction of Spartan bar sets ensures ease of installation for large-scale projects, and the modular design means they can be engineered to secure almost any opening.
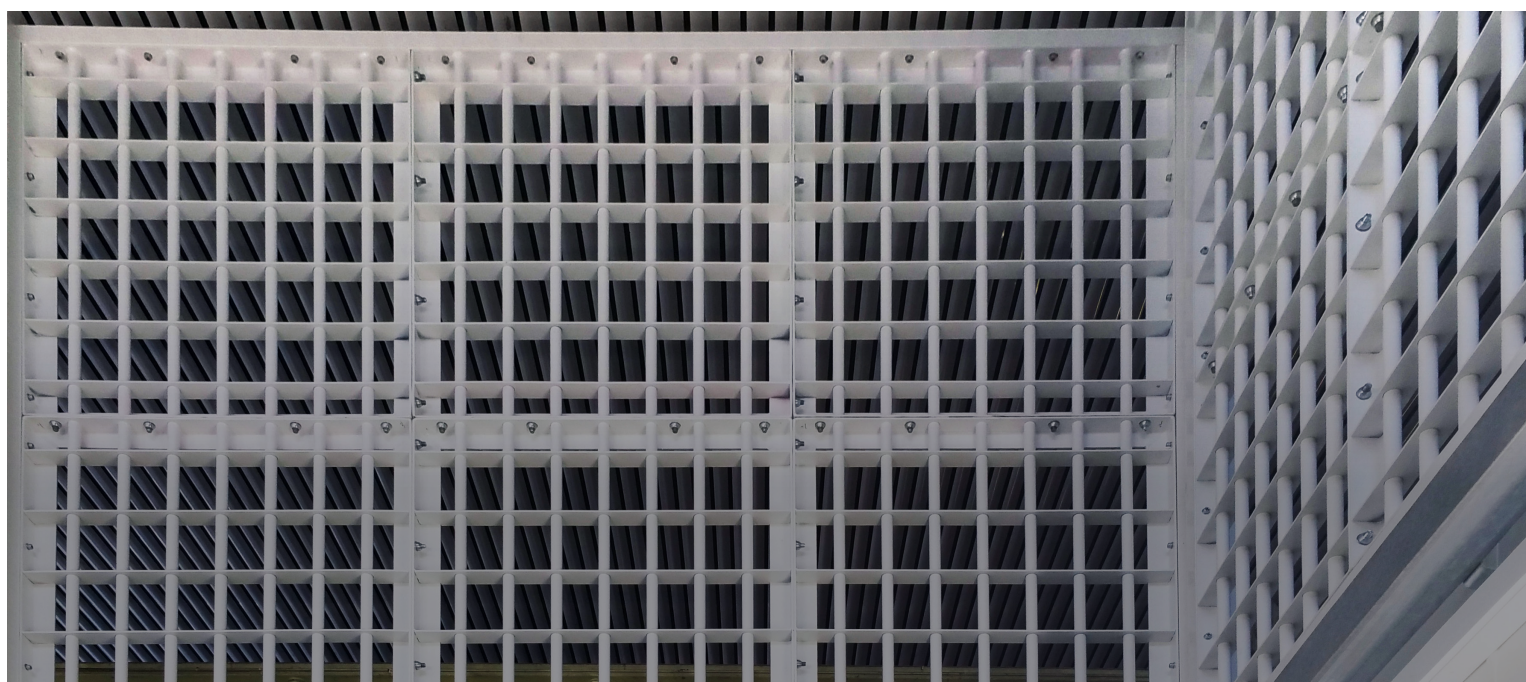

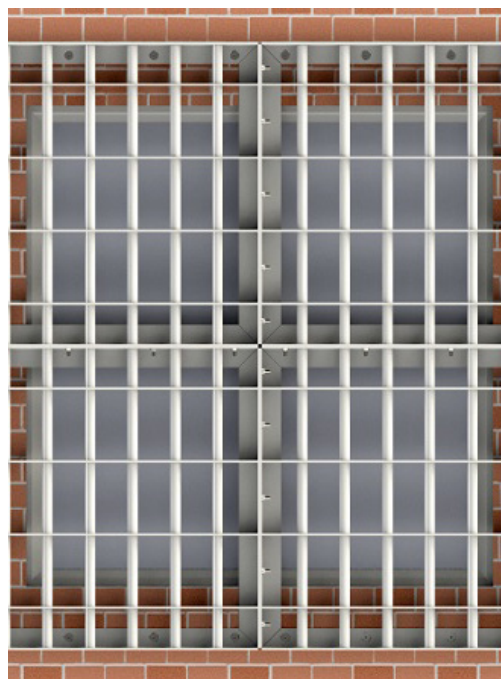

Products
Accreditation

UKCA Marking

UKCA certification is compulsory for all external fire doors in the UK. This will be effective from the 31st December 2022 making it a legal requirement as part of the building regulations, that all external rated doorsets are UKCA marked to EN 16034 and BS EN 14351-1.

The entire range of security certified doors have achieved external fire CE/UKCA Certification, including its Security Rated 4 (SR4) doors. Each of the LPCB LPS 1175 certified doorsets have achieved this status.

The Loss Prevention Certification Board

LPCB is a globally recognised third-party certification body delivering certainty for over 150 years.

Certifire

Certifire is an third-party passive fire product certification scheme that assures performance, quality, reliability and traceability of products and systems.

Secured by Design

Secured by Design (SBD) is the official police security initiative that works to improve the security of buildings and their immediate surroundings to provide safe places to live, work, shop and visit.

SBD's product based accreditation scheme – the Police Preferred Specification - provides a recognised standard for all security products that can deter and reduce crime.
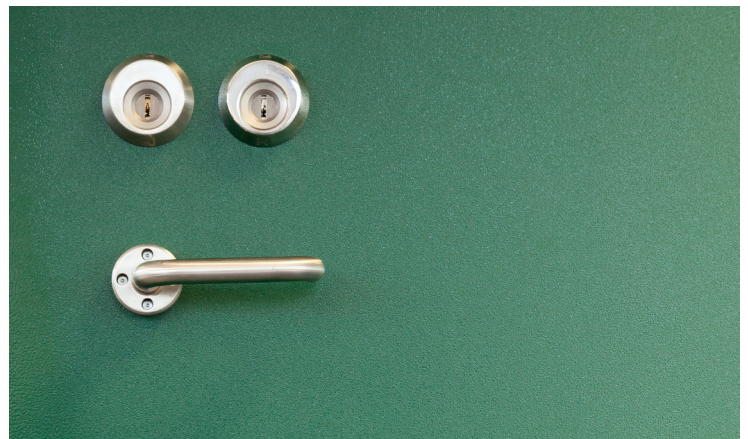

Colours
& Finishes

Our products are polyester powder coated as standard with an extensive array of colours and finishes to choose from. As well as solid colours, we also offer a captivating woodgrain-effect finish.
